Lavanya

I am a Computer Science student seeking an internship to apply my programming skills and problem-solving abilities. Looking ahead, I aim to build a long-term career in a company where I can leverage my professional and technical skills to contribute to both organizational growth and my personal development.

B.E. in Computer Science and Engineering | 8.16 CGPA
St Joseph Engineering College Mangaluru, Karnataka | 2023-Present

Diploma in Computer Science and Engineering | 81.7%
Govt. Polytechnic for Women, Karnataka | May-2022

X - SSLC | 80.64%
Shree Narayana Guru English Medium School Katipalla, Kaikamba |Apr-2019

Project

Object Detection App | *HTML, CSS, PYTHON (FLASK), OpenCV* (Ongoing project)
Developed an object detection application using HTML, CSS, and Python (Flask), integrating YOLO for real-time object detection and OpenCV for image processing.

AgroCulture| *HTML, CSS, SQL, PHP, XAMPP*
A web application aimed at connecting farmers and buyers directly without intermediaries. Built using HTML, CSS for frontend, SQL for database management, PHP for server-side scripting, and XAMPP for local development environment.

Spotify Playlist | *Python*
A Python project that retrieves and displays the top 100 songs from a selected date in past years using the Spotify API. Users can select a specific date to view historical music trends.

Snake Game | *Python*
Developed a Python version of the classic Nokia Snake game, implementing game mechanics and graphics using Python's libraries and frameworks.
